

PERNUMA PERFOSET EX/L

Electric Hole Punching Machine for Document Piles of up to 20 mm.
Marking up to 200 Sheets of Paper within 2 Seconds.

For forgery-proof marking or cancelling of tender documents, submissions, etc.

PERFOSET EX/L is a very robust electric hole punching machine for office use. Developed for highest demands it is employed where great amounts of documents are handled.

In one operation within 2 seconds up to 200 documents can be marked quickly and without any effort.

The machine is equipped with one of the symbols in 8 mm ø shown on the verso of this leaflet.

You have the choice of 13 symbols. The chosen symbol is then firmly installed into the machine. The punching is released by the foot switch. The machine is equipped with adjustable side and rear gauges, thus the documents are punched constantly at the same position.

The insertion depth is approximately 62 mm.

The standard equipment of the machine comprises a safety lock preventing unauthorized persons from using the machine.

PERNUMA PERFOSET EX/L

Electric hole punching machine for document piles of up to 20 mm. Marking up to 200 sheets of paper within 2 seconds.

Technical Data

PERNUMA PERFOSET EX/L
