

PERNUMA OFFICE CP
Electric Corner Perforating Machine

With this model a tear-off perforation in the shape of a quadrant or a straight line can be made in the corner of a booklet or a calendar for example.

The machine is produced individually according to your requirements regarding the size of the radius or the length of the perforation line.

It is equipped with fixed gauges in its standard version for an easy positioning of the documents.

You can choose between a pin diameter of 0.8, 0.9, 1.1 and 1.25 mm.

The perforation is released by pressing the lateral push button.

Up to 25 sheets of 70 g/m² paper can be perforated in one operation. The insertion height is ca. 2.5 mm.

This model, too, can be delivered with a foot-pedal switch or equipped with a security lock like all the other machines from our OFFICE line.

In a special version available with

- a perforation line adjustable in its length or with interchangeable line lengths
- adjustable or interchangeable radii
- several pin diameter (in one machine)
